Professional Summary

B.Tech Computer Science student passionate about Artificial Intelligence, AI-powered product development, and emerging technologies. Skilled in Python, problem-solving, APIs, and backend workflows, with hands-on experience building AI-driven web applications and practical software solutions through projects and internships. Quick learner experienced in AI-assisted development tools and collaborative Agile-style environments.

Technical Skills

- **Programming:** Python (NumPy, Pandas, Matplotlib), C, Java
- **AI & ML:** Machine Learning, Data Preprocessing, Scikit-learn, Prompt Engineering
- **Database & Tools:** MySQL, Excel, Tableau, PowerBI, Git, GitHub, Figma
- **Core Concepts:** OOP, DBMS, APIs, Problem Solving, Agile Workflows, Feature Engineering

Technical Projects

Substance Use Prediction in Students

Jun 2025 – April 2026

- Developed a secure predictive web application using Flask, Ngrok, and AI-driven workflows to analyze behavioral, academic, and clinical indicators for estimating student substance-use risk.
- Served as the ML & system development lead, responsible for data preprocessing, feature engineering, and training advanced models such as CatBoost, Random Forest, and Logistic Regression for integrating and optimizing these models for deployment.
- Designed a responsive, user-friendly interface that presents clear, actionable insights to support timely intervention and improve student well-being outcomes.

MovieScore - Movie Success Prediction System

Jun 2025 - Jul 2025

- Built an end-to-end ML system to classify movies as Hit or Flop using the TMDb dataset, including preprocessing, JSON feature extraction, and ROI-based target creation
- Trained and evaluated multiple models, selecting Random Forest as the optimal model through performance comparison and tuning
- Deployed the trained model as a real-time prediction system using a Flask API with a lightweight frontend interface, enabling practical AI-driven decision support

Resume Builder Web Application

Dec 2024 – Apr 2025

- Developed a full-stack resume builder platform supporting multiple export formats including PDF, DOCX, and TXT, enabling seamless one-click downloads across devices.
- Led the core application engineering, implementing real-time autosave, cloud synchronization, and multi-device support to ensure smooth and continuous editing for users.
- Designed ATS-friendly customizable templates and dynamic layouts, ensuring both personalization and high compatibility with automated recruitment systems.

Certifications

- Artificial Intelligence & Machine Learning Intern – ICT Academy of Kerala
- Cloud Infrastructure 2025 Certified AI Foundations Associate
- 5-Day AI Agents Intensive Course with Google – Kaggle
- AI For Everyone – DeepLearning.AI
- SQL (Basic) – HackerRank

Achievements

- IEDC Creative Lead, CCET (2025–26)
- Design Team Member, TEDx CCET (2024)
- Participant – IEEE Xtreme 17.0 & 18.0

Internships

Artificial Intelligence & Machine Learning Intern | ICT Academy of Kerala Jun 2025 - Jul 2025

- Completed intensive training in Python, data preprocessing, and machine learning workflows, including supervised and unsupervised learning techniques
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn
- Implemented and evaluated multiple ML models such as Logistic Regression, k-NN, SVM, Decision Trees, and Random Forest
- Developed a machine learning project “MovieScore”, a movie success prediction system, while gaining exposure to Generative AI concepts, Neural Networks, Computer Vision, and NLP applications.

Education

B.Tech in Computer Science	2022–2026
Carmel College of Engineering and Technology, APJ Abdul Kalam University	
CGPA: 7.62	

Higher Secondary (Bio-Maths)	2020–2022
St. Mary’s Residential Central School (CBSE)	

High School	2018–2020
St. Mary’s Residential Central School (CBSE)	

Languages Known

Malayalam (Native), English (Professional), Hindi (Can understand well), Tamil (Conversational)
